DETAILED ACTION

Allowable Subject Matter

1. Claims 1 and 3-41 are allowed.

The following is an examiner's statement of reasons for allowance:

In regard to claim 1, Applicant's claimed invention is deemed allowable over the prior art of record as the prior art fails to teach or suggest either alone or in combination wherein the value of each matrix element is defined as a function of a spacing between memory-centers i and j given by $C_{ij} = f(r') = f(|r_i - r_j|) = f(R_{ij})$ where $f(r')$ is defined as a cross-talk function, and wherein said cross-talk matrix C is calculated by applying said cross-talk function to each element of a matrix R that contains all inter-memory-center spacings $R_{ij} = r' = |r_i - r_j|$.

In regard to claim 6, Applicant's claimed invention is deemed allowable over the prior art of record as the prior art fails to teach or suggest either alone or in combination accessing the storage medium with an addressing system and measuring for each memory-center a scalar signal intensity I_m emitted from a pre-selected region which is centered on the known position of said memory-center, specifically **having an intensity distribution defined by an impulse response of the addressing system and an effective distribution of the signal stored within the addressed memory-center.**

In regard to claim 25, Applicant's claimed invention is deemed allowable over the prior art of record as the prior art fails to teach or suggest either alone or in combination accessing said optical storage medium with an optical addressing system and measuring for each memory-center a total optical intensity I_m emitted from a pre-selected region which is centered on the known position of said memory-center, specifically **having an optical intensity distribution within a single pre-selected region $I_0(q)$ defined by a point spread function of the optical addressing system and an intensity distribution of the memory-center itself defined by an optical response of a single memory-center as imaged through an idealized optical addressing system having an infinitely small point spread function.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
